

Communication • Confidence • Career Readiness

A measurable institutional system for helping students demonstrate what they know.

ASSESS	IDENTIFY GAPS	TRAIN	PRACTICE	MEASURE
Common-core level check	Individual + department insight	Targeted learning pathways	Career simulations	Pre/post reporting

The institutional opportunity

Students may have knowledge but struggle to express it in interviews, presentations, teamwork and workplace scenarios. Unmute Pro separates communication ability from speaking confidence so colleges can support the right learners with the right intervention.

What the college receives

Learner outputs	Institution outputs
Communication Readiness Score (0–100)	Executive and department dashboard
Confidence Index (0–100), reported separately	Competency heatmap and UP1–UP5 distribution
UP1–UP5 developmental band	Support-priority indicators
Pre/post scorecard and 30-day practice plan	Matched-cohort improvement view

One common core, relevant career practice

B.Tech and MBA learners share the same core assessment. Stream-specific modules then test realistic career communication: technical explanation, project updates and requirements for B.Tech; business cases, stakeholder influence, negotiation and executive updates for MBA.

Suggested pilot

Scope: One priority cohort or department | **Sequence:** Baseline → gap report → training/practice → post assessment |

Governance: Institution-approved data fields and role-based reporting. Final scope, schedule and commercial terms are agreed after discovery.
